Data Flow & Communication

Path 1: task submission

```
UI/API -> /api/tasks/ -> PENDING -> GA scheduler -> ASSIGNED ->
MEC agent polls next-task -> RUNNING -> report-result -> COMPLETED.
```

Path 2: MEC telemetry

```
Agent -> POST /api/mec/heartbeat/ -> process_heartbeat() ->
updates MECAgent row + digital twin ResourceState -> UI charts.
```

Path 3: cloud data

```
UI/API -> POST /api/cloud/upload/ -> GoogleDriveFile record +
(simulation/local bytes or Drive) -> GET /api/cloud/files/ -> UI.
Downloads stream via /api/cloud/download/<id>/.
```

Path 4: data, not advertisements

```
All dashboard/storage numbers are computed by the REST API from the
MySQL database and live agent heartbeats - nothing is hard-coded.
```
