Google Drive / Cloud Storage Setup

Cloud Storage page

```
Nav -> Cloud Storage: view uploaded files, create folders, list files,
check quota from /api/cloud/status/.
Uploads: POST multipart to /api/cloud/upload/
Download: GET /api/cloud/download/<file_id>/
```

Datasets workflow

```
Nav -> Datasets: upload CSV/JSON/zip datasets into the cloud workspace
and sync them to the server's datasets/ folder for training.
Currently Google Drive runs in simulation mode (local folder emulation)
with the same upload/status/list API contract.
```

API reference

```
GET  /api/cloud/files/          list files (filter: ?category=dataset)
POST /api/cloud/upload/         multipart upload
GET  /api/cloud/status/         quota / storage usage
POST /api/cloud/folders/        create folder
GET  /api/cloud/download/<id>/ download a file
```
